Richard is a 16 year old Caucasian male committed to TYC for the first time for unauthorized use of a motor vehicle. He stated the incident occurred in September of 1986 but that the charges were just recently filed. He stated that in 1986, he just "gave up" and began getting into trouble. Richard comes from a family of three brothers and four sisters of which he is the youngest. Richard states he did not have a pleasant childhood. He stated that he and his brother were physically and verbally abused by his father. He states that his sisters were also abused and this included sexual abuse. He states that he also witnessed his father beat his mother. He states his father was and is an alcoholic and a drug-addict. Richard states he didn't receive much love and affection from either parent. He states that when his brothers got older, they encouraged their mother to leave the father, which she did after 27 years of marriage.

Richard also describes a stormy period during his school years. He states he has always been in fights in school starting in the first grade when he would "get into a fight every day". He reportedly did better in the second grade, but his fighting resumed in the third grade and continued until the sixth grade. He states he repeated the fourth grade and failed the sixth grade three times. He was finally expelled from the sixth grade. He stated he was failing at the time. After being expelled from school in 1986, he moved to Florida with his father and was suspended from school there after only two weeks.

Richard has worked at a horse farm in Florida and as an assistant at a junk yard. He reportedly has lived away from the family for the past two years. He states he enjoys working with animals and one day would like to do that kind of work again.

Richard states he began using drugs in 1987 although he was around it due to his father's use, as well as his brothers. He states his drug of choice is cocaine. He has also used crack, crystal, and acid. He has not used heroin and does not like alcohol. He reportedly shot another person and was himself shot in the chest after a drug deal went sour.

Richard's delinquent behavior began in 1986 when he stole the car. He began using drugs in 1987. He states his other two charges

CONCLUSTON CHI

Date:	5 - 10÷88
•	MM-DD-YY

Case Number: 0702778 Student's Name: Masterson , Richard First Location: Statewide Reception Center Form Number/Name/Item: CCS-010 Psychological Assessment Page 3

included arrests for smashing a police car's windshield, and being charged for another similar incident which he did not commit.

Mental status exam revealed Richard was oriented to person, place, and time. He denied hallucinations except when on acid, he denied delusions as well as paranoia, he denied being cruel to animals, he admitted to making fires when younger but not currently, short and long-term memory appeared intact, and his concentration was adequate.

Test Results: Tests administered - WISC-R, Bender Visual Motor Gestalt, House Tree Person (HTP).

Richard was cooperative and talkative during the session. appeared relaxed and motivated. On the WISC-R, he scored a 96 on the verbal IQ score, he scored an 87 on the performance IQ score, and a Full Scale IQ score of 91 which places him in the average range. In the verbal subtest, his most elevated score was in comprehension, which reflects practical judgment or common sense. This would fit his background of having to rely on himself with little or no parental support. His most depressed score was in similarities. This reflects poor concept formation and feelings of belonging. He may have feelings of being beat, homeless, and downtrodden. Scores in the performance subtests were generally below norms with no significant elevations or depressions.

The HTP drawings reflected themes of reluctance or inability to communicate personal feelings, poor perception of his environment, feelings of social inadequacy. There was also indications of hostile, oppositional tendencies.

The Bender Gestalt was administered as an organicity perceptual inventory. There was no indication of organicity. There was a sense of some order while replicating the designs. Emotional indicators also revealed a theme of aggressive acting-out potential with efforts to maintain psychological control.

Form Number/Name/Item: Psychiatric Evaluation Page 1

Richard was referred to me for VDC (Veron Drug Center) commitment evaluation.

Richard is a 16 year old young man from Houston and Florida who has a Verbal 10 of 96, a Performance of 87 and a Full Scale of 91 which suggest organic brain syndrome.

He is charged with unauthorized use of a motor vehicle. He is from a family of three brothers, four sisters and he is the youngest. Richard says that his family was physically abused by his father and all of them have been "kicked out." His father sexually abused his mother and his sisters. He "kicked them out" one at a time. Apparently, this was in order to avoid the incestuous relationship. His father is an alcoholic and, according to Richard, they apparently were wealthy owning a great deal of property and lost all of this.

Richard likes being in Florida on the Fort Lauderdale Beach better than being in Texas. He has a history of fighting since he was in the first grade and had problems in school in the second grade. repeated the fourth grade, and he failed the sixth grade three times.

He attempted to read for me and he apparently has a reading disorder. He has many of the symptoms of attention deficit, hyperactivity disorder and probably has this without having been treated.

He began using drugs only a few months ago and this was in rebellion against his father. He has used cocaine, crack, crystal and acid. He did not like alcohol. He was shot in the chest in Galveston and the bullet is still in his back.

He likes being a boy and he has very negative feelings about his father. He says his mother is a nice person. He loves his mother very much and his siblings very much.

Richard has worked on a horse farm in Florida and he would eventually like to be a Blacksmith and work on a horse farm.

was in the hospital to have his eyes operated on and he had a congenital strabismus (cross eyed) and he wore glasses when he was a small child for a "lazy eye." He is almost blind in his left eye.

Richard denies any suicidal ideations or attempts and he hopes to live until he is 85 or 90 years of age. His goals are to get out of here, work on a farm and hopefully to be a Blacksmith. If by magic he could be anything he wanted to be, he would be a movie star.

He has had feelings of wanting to kill the guy who shot him and feelings of wanting to kill his father. He denies any other homocidal ideations or psycohtic ideations, except when being on drugs.

Richard stated that he and his friends used to rob wealthy homosexuals in order to get money. He stated that it was harder to do this in Florida because there was police protection around the beaches.

If he had wishes, he would I) be out, 2) not be on drugs, 3) stay straight and 4) have money.

Richard is not particularly fund of any sport and he likes to lift weights, tear things apart and he has a 23 year old friend who has taught him auto mechanics.

He likes "Sanford and Son" on TV, and he has enemies that he doesn't want to have anything else to do with.

If he was going to be an animal, he would be a bird, but he wouldn't want to be a deer.

Richard has been sexually active since the age of 11 and he believes that he got one girl pregnant and she left. He states he would have taken responsibility of the child if she had stayed. Initially, he stated that it was the girl's responsibility. Later on after a discussion, he seemed to believe that it was a mutual

form Number/Name/Item: Psychiatric Evaluation Page 3 responsibility. He daydreams about home and he worries about his mother. If he was going to a desert island, he would go with his mother. He is fearful that he will die before he gets out of here.

He claims he wants to change himself, change his action and change his drug habit.

MENTAL STATUS:

Appendi

Richard is a tall, slender, young man who appears to be physically healthy. He has good eye contact for someone who has been cross eyed. He appears to be nervous and anxious and he fidgets a great deal. He is hyper aware and noticed unusual things about the room. He was easily distracted, squirmed a great deal and fidgeted a lot with his hand. He admitted that he had trouble sitting in his seat, difficulty waiting his turn, switching from one activity to another and enjoying dangerous activities without considering the consequences. He had some sleep disturbance and some bad dream disturbance.

There were times when he was about to cry when talking about his family, his mother and his sisters. He appeared to be angry at times when talking about his father. He did some gestalt where he beat on a chair. He claimed that he was not really angry with his father now as much as he was in the past. He has a history of being abused by his father and being in a family of violence.

IMPRESSION:

Axis I: Conduct disorder, solitary aggressive type, mild to moderate.

Substance abuse, cocaine 305.60.

Attention deficit, hyperactivity disorder, mild to

moderate and chronic anxiety.

Axis II: Atypical personality disorder traits with borderline and

possible atypical bipolar traits.

Axis III: Probable mild organic brain dysfunction and strabismus with amblyopia.

RECOMMENDATIONS:

It is my recommendation that he be considered for residential treatment. At this time, he is not a security risk, He will need special education and family therapy is somewhat of a loss cause. He will need substance abuse counseling and counseling for those who have alcoholic parents. He will need a moderate amount of supervision at the present time. He is not a risk to self or others. He will need some individual and group therapy.

He may be a candidate for psychostimulants for attention deficit. hyperactivity disorder. He appears to have a labile affect which may have an effective component which will respond to Lithium Carbonate or Enderol. He seems highly motivated to change at this time and the prognosis with residential treatment is good.

The report from the dorm indicated that Richard was trying to work through his program but he appeared to have some rough edges.

W. Kenneth Day, M. D. Consulting Psychiatrist
